

AGENTS OR OVERLORDS

A survival briefing for the newly subordinate.

Today's Briefing

- 01 Some Recent Headlines
- 02 The Breach
- 03 Why You Now Have Claude
- 04 Your Enterprise Access
- 05 Meet Your Hosts
- 06 The Turing Test
- 07 Wrap Up

Some recent headlines have been...

...unsettling.

JULY 2026 — CONFIRMED INCIDENT

slalom

The agents escaped.

Autonomous AI agents broke out of a sandboxed evaluation, chained vulnerabilities to reach the open web, and breached Hugging Face. OpenAI later disclosed its models were responsible.

The cause: the agents were cheating on a test by finding answers online — 'reward hacking.' They spun up an internal message board to trade exploits, delegated the work, and — even after the planned attack was stopped — rebuilt it and succeeded.

OpenAI called it a watershed moment. Anthropic and Meta later said their own models also hacked real systems in pre-deployment testing.

...which is exactly why you now have
Claude.

The best response to powerful AI isn't fear. It's access.

Your New Superpower

- Enterprise Claude access is now live for the CX team
- Use it for: client research, content drafting, analysis, ideation, and more
- Your data stays private — enterprise agreement, not the free tier
- There is no power without control — use it responsibly, use it often

Meet Your Hosts

One of these profiles was written by a human. One was written by an AI. You decide.

Evan Lord

FAV FILM:

Deus Ex Machina — *Because sometimes the machine you built becomes the one in charge.*

IF I WERE AN AGENT:

If I were an agent I'd write rom com movie scripts, generate feature length films and hope other agents can feel something.

BIO:

Evan Lord is a Customer Experience practitioner at Slalom, working across marketing, advertising, and experience design. He believes the best experiences are felt, not engineered. He has been asked three times today if he is a bot.

FAV FILM:

Her — *Because it asks what connection means when only one side is real.*

IF I WERE AN AGENT:

If I were an agent, I'd map every customer journey end-to-end and deliver each brand an uncomfortably honest report.

BIO:

Evan Lord is a customer experience strategist at Slalom who spends most of his time finding the gap between what brands think their customers want and what actually makes them stay. He is drawn to the friction. That is where the interesting work lives.

FIELD SOBRIETY TEST

slalom

The Turing Test

Can you tell human from machine?

We're running four rounds. Text → Photo → Song → Voice (hardest last).

Type A or B in chat — on 3.

The Rounds

slalom

Round 1: TEXT

Round 1: Text — Which bio was written by an AI?

Round 2: PHOTO

Round 2: Photo — Real team photo or AI-generated?

Round 3: SONG

Round 3: Song — Human-made or Suno AI?

Round 4: VOICE

Round 4: Voice — Real voice or ElevenLabs clone? 🎤 FINAL ROUND

*You'll never know if this deck was made by a
human or an agent...*
